

# DAKINI ENVIRONMENTAL

Clear advice | Practical solutions | Better environmental outcomes

We provide practical, science-based environmental consulting services for land development, infrastructure, industrial, mining and government projects. Our team delivers robust investigations and risk-based solutions that help clients understand environmental liabilities, meet regulatory requirements and make informed decisions.

## CORE SERVICES

|                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                        |
